Cloud Computing Lab (CSL803)

TW-50, Oral-25

1. What is virtualiation ?What are the features of oracle virtual box?

2.What is KVM Hypervisor?

3. what is command for user creation in kvm

4 what is Xen sever?

5 What is SAAS PAAS IAAS?

6.what is Ulteo?

7.how to install Ulteo?

8 what is open stack? Describe its features?

9.How to install open stack?

10 git command to update ubuntu repository?

11 What is git pkg instllation command?

12 what is command to download latest git repository?

13 what is devstack directory installation command?

14.how to create and run instances in openstack?

15 how to launch instance in openstack

16 what is own cloud? features?

17 what are commands for owncloud installation?

18 command in owncloud: Set the document root?

19 command in owncloud:steps to configure MySQL database?

20 different types of cloud ?

21 what are the services offered by Cloud Computing?

22 Application of cloud computing?

23. What are advantages of cloud computing?

24. Enlist Deployment models of Cloud computing?

25. Enlist Service models of Cloud computing?
